Description:

Interactive Discovery of Underwater World and Marine Life

We rarely get to encounter sea animals in our daily life. Sea animals have their own unique characteristics and biology, and live active lives. The way they embrace life is far beyond our imagination, amazing and moving us.

We hope visitors to Kamogawa Sea World will come face to face with this amazing sea life and enjoy interacting with sea animals both physically and emotionally.

We will be using Aqua line and stopped at Umi-hotaru Parking Area.
