

CYBERFORWARD by CISOSHARE

The field of cyber security is one of the fastest growing career fields today. Companies are spending more time focusing on security and need more qualified individuals to work in specialized roles, but existing certification programs don't emphasize the right skills.

You don't need any technical skills to start your career in cyber security — successful professionals need to focus just as much on interpersonal and soft skills as technical security knowledge. If you're a quick learner, work well in teams, and think logically, you have what it takes to work in cyber security.

- No cost for training — build a strong cyber security foundation
- Opportunities in a continuously growing field
- 4-week training program: 1 class/week, 3 hours/class
- 4-week internship to prepare you for job placement
- Continued mentorship during employment

PARTICIPANT BENEFITS:

- Make a difference in securing organizations.
- Help the cyber security resource shortage.
- Join a high-growth industry with job security.
- Strengthen your résumé with training experience.
